

Exhibit 2: Photos

*A portion of O'Neill Sea Odyssey's science and environmental program occurs on this learning platform.*

Exhibit 2: Photos

*Kids learn about marine science using a plankton net.*

Exhibit 2: Photos

*The youth are quizzed on some basics before the plankton net is lowered into the water.*

Exhibit 2: Photos

*After the plankton are collected, they are stored in vials to take back to the education center.*

Stu

*Students use compasses to learn navigation skills on board the boat.*

Exhibit 2: Photos

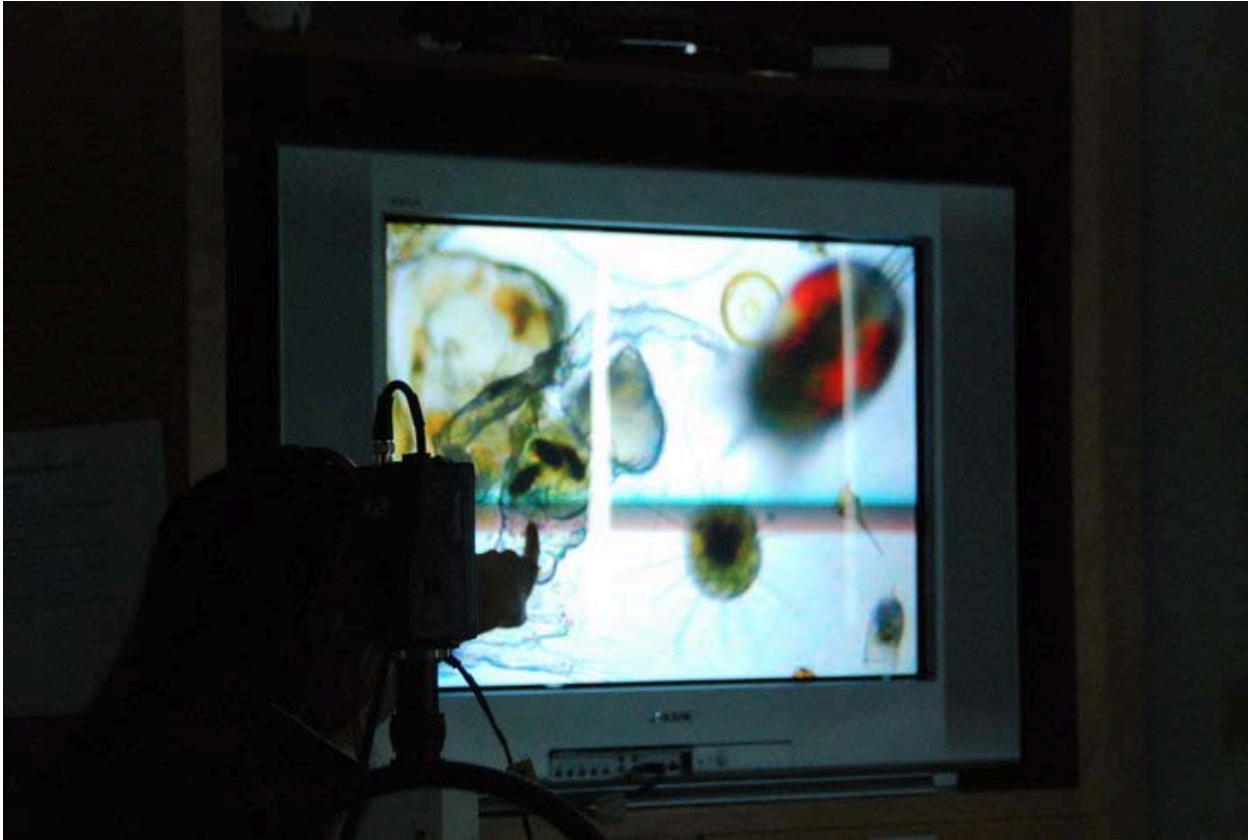

*Navigation on the boat and in the education center provides mathematics, triangulation and geometry.*

Exhibit 2: Photos

*A watershed education component reinforces for students the connection between the land and sea.*

Exhibit 2: Photos

*The plankton collected offshore is viewed in the education center.*

Exhibit 2: Photos

*The world's largest classroom.*
